Part 2. In 5 -6 sentences per items answer the ff:

5. Why are platforms considered the foundation of modern computing.
 - These serve as the foundation for current computing since they provide a foundation on which all apps and services operate. Operating systems are required for hardware to function properly. They serve as a link among people, apps, and gadgets, allowing for effective communication and functionality. Platforms help programmers to create programs that perform reliably across different computers. It renders them indispensable to creativity, efficiency, and everyday use of technology.
6. Why are Platform Technologies Important.
 - Technology platforms are important because they provide the tools and guidelines needed to develop and use digital products and services. They enable different applications and websites to connect effectively and easily. Mobile platforms, for example, enable users to interact with apps and communication tools, and cloud services allow users to store and share data from anywhere. They enable handling of data and cooperation in business, as well as e-learning in education.
7. Collectively define platforms and their impact on modern society.
 - There is a specialized impact on modern society that allows devices. Examples include operating systems, virtualization tools, mobile apps, and cloud services. Their influence on modern society is considerable because they shape how people work, learn, and interact with one another. For example, applications such as Google Meet and Microsoft Teams enable seamless virtual learning and distant work. These online platforms have additionally altered the way people connect and share information across the world
8. What do you think is the importance of platforms in everyday life and in the IT field.
 - In our everyday life, these platforms are essential nowadays because they make our work, studying, and communication easier. And some of the students now use the platforms to access online classes instead of getting to school, and collaborate with their classmates through online meetings. The family also relies on social and mobile platforms to contact and stay connected, even across the world. In the IT field, platforms are crucial because they allow the creation, testing, and deployment of applications and services. Without platforms, both daily activities and professional IT work would be much less efficient and effective.
